

Recycled Bottle

Flowers

1

Start with a clean bottle. Remove (but save) the label.

2

Cut the bottle in half. Have a grownup help.

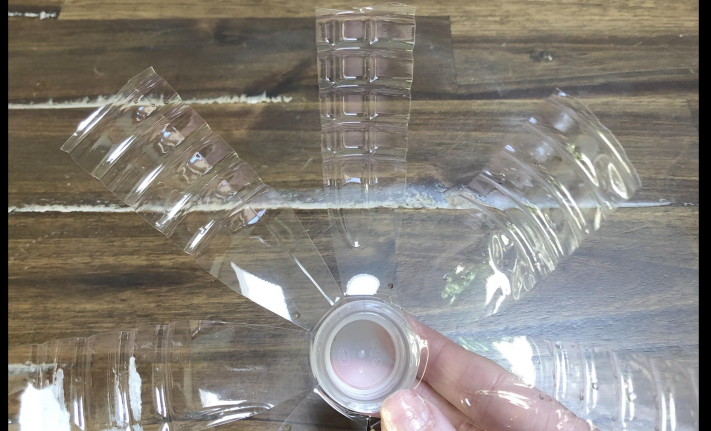

3

Start cutting "petals" on the top half of the bottle about an inch apart.

4

Bend the petals outward to create a flower.

5

Make rounded petals by cutting curves on the end.

6

OPTIONAL

If you have color permanent markers, color the inside of the petals.

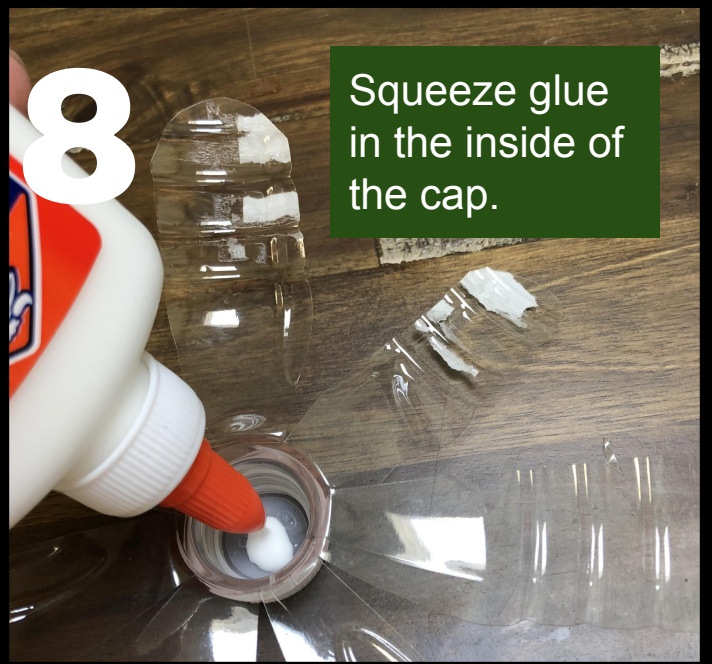

7

Find a stick to make a stem.

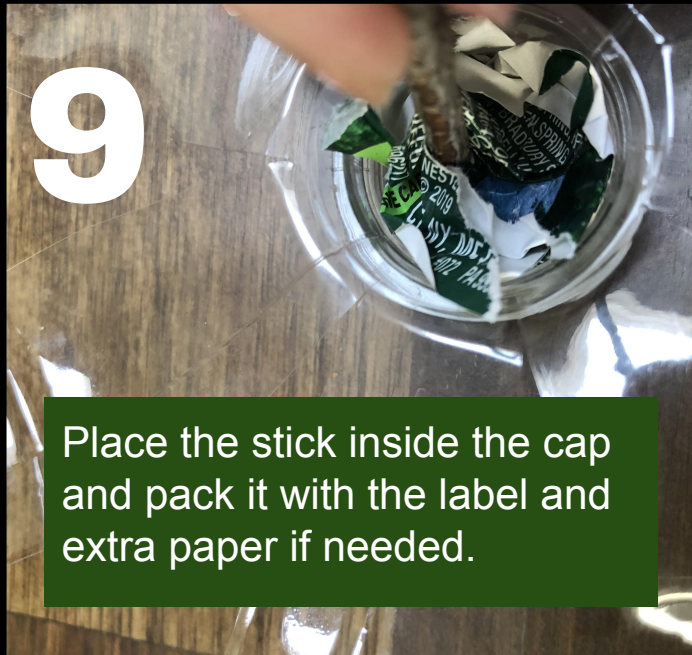

8

Squeeze glue in the inside of the cap.

9

Place the stick inside the cap and pack it with the label and extra paper if needed.

10

Collect sand or rocks for your "vase."

Place the flower in the vase and you are done!
